

Ultimate Skin Solution for *Face and Body*
A New Era in Body Sculpting

PURE BOTTLE

WHAT IS PURE BOTTLE?

Pure Bottle is a premium fat-dissolving solution, formulated with high-purity active ingredients for optimal results. Its carefully selected components — Riboflavin (Vitamin B2), Bromelain, Lecithin, Quercetin, Butterfly Pea Flower Extract, Copper Tripeptide-1, and Blueberry Extract — work synergistically to promote targeted fat reduction while also enhancing skin health.

PRODUCT SPECIFICATION

Product Name	Pure Bottle

Package	10 ml x 5 vials
Ingredients	<ul style="list-style-type: none">• Riboflavin (Vitamin B2), Bromelain, Lecithin, Quercetin• Arginine, Carnitine, Centella Asiatica Extract, Peptide Complex, Glutathione, Ascorbic Acid• Butterfly Pea Flower Extract, Copper Tripeptide-1, Blueberry Fruit Extract

Manufactured in South Korea

MAIN INGREDIENTS

Riboflavin (Vitamin B2)

Riboflavin, also known as vitamin B2, helps boost fat metabolism, improving the body's capacity to break down and utilize fat for energy.

Bromelain

Bromelain, extracted from pineapple (*Ananas sativus*), is known for its anti-inflammatory properties and is commonly used as a supplement to aid digestion and reduce swelling.

Lecithin

Lecithin is a natural fat emulsifier that plays a key role in breaking down fat into smaller components, making it easier for the body to naturally eliminate it.

Quercetin

Quercetin is a potent antioxidant and anti-inflammatory compound found in many fruits and vegetables. It promotes fat breakdown and inhibits the formation of fat cells.

SUB - INGREDIENTS

Arginine, Carnitine
Centella Asiatica Extract

These substances help activate metabolism by using stored fat as an energy source, which aids in reducing body fat.

Peptide Complex

The peptide complex promotes collagen production in the skin, helping to improve elasticity and reduce the appearance of wrinkles, while also enhancing skin texture.

Glutathione
Ascorbic Acid

Glutathione and Ascorbic Acid eliminate reactive oxygen species that accelerate cellular aging, preventing further aging, and help brighten the skin by blocking melanin pigmentation through their antioxidant effects.

WHAT MAKES PURE BOTTLE BLUE?

The unique blue color of the formula comes from a blend of premium ingredients :

Butterfly Pea Flower Extract, Copper Tripeptide-1, and Blueberry Fruit Extract.

These components not only give the formula its rich color but also enhance its effectiveness.

Butterfly Pea Flower Extract

Butterfly Pea Flower Extract, known for its antioxidant and anti-inflammatory effects, boosts fat breakdown and reduces fat formation, aiding in anti-obesity.

Copper Tripeptide-1

Copper Tripeptide-1 stimulates the production of collagen, elastin, and hyaluronic acid, enhancing skin elasticity and density. It helps reduce fine lines, provides antioxidant protection, and offers soothing effects.

Blueberry Fruit Extract

Blueberries, rich in polyphenols and anthocyanins, provide powerful antioxidants that neutralize reactive oxygen species, prevent oxidative damage, and slow the aging process. It also helps to soothe irritated skin.

KEY BENEFITS

Quick & Effective Results

Pure Bottle quickly targets stubborn fat, sculpting a toned body and smoothing skin with visible results in no time.

Natural Origin Ingredients

Natural extracts break down resistant fat, targeting specific areas for a smoother, more sculpted look with safe and effective results.

Most Advanced Formula

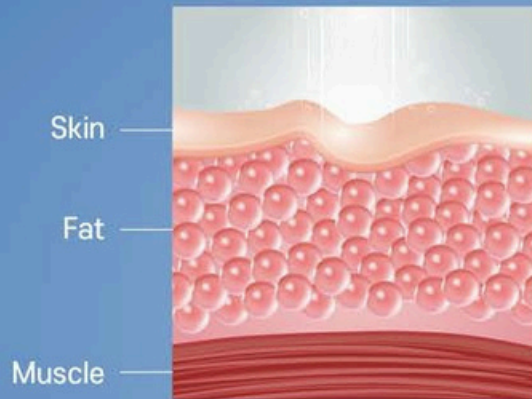

Our innovative formula not only reduces fat but, also improves skin elasticity, helping you achieve firmer, smoother skin with a more toned appearance.

BEFORE AND AFTER

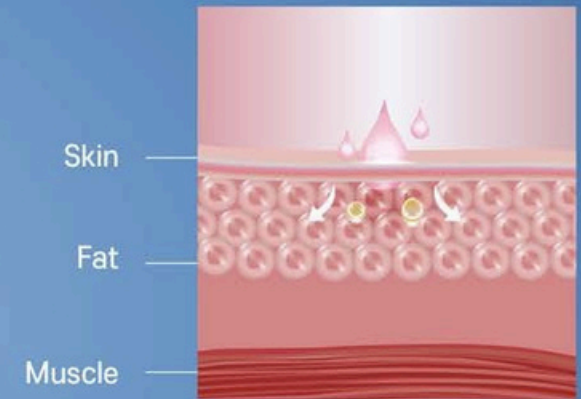

HOW PURE BOTTLE WORKS?

BEFORE

AFTER

Pure Bottle directly targets the adipocyte cells and causes cell membrane breakdown.

1

Riboflavin (Vitamin B2) stimulates the activation of fat metabolism.

2

Lecithin breaks down and carries away unwanted fat cells.

3

Bromelain aids in breaking down fat and reducing inflammation.

APPLICATION AREAS

V-Line : 5 ~ 10 cc

Double Chin, Deep Cheek : 10 ~ 20 cc

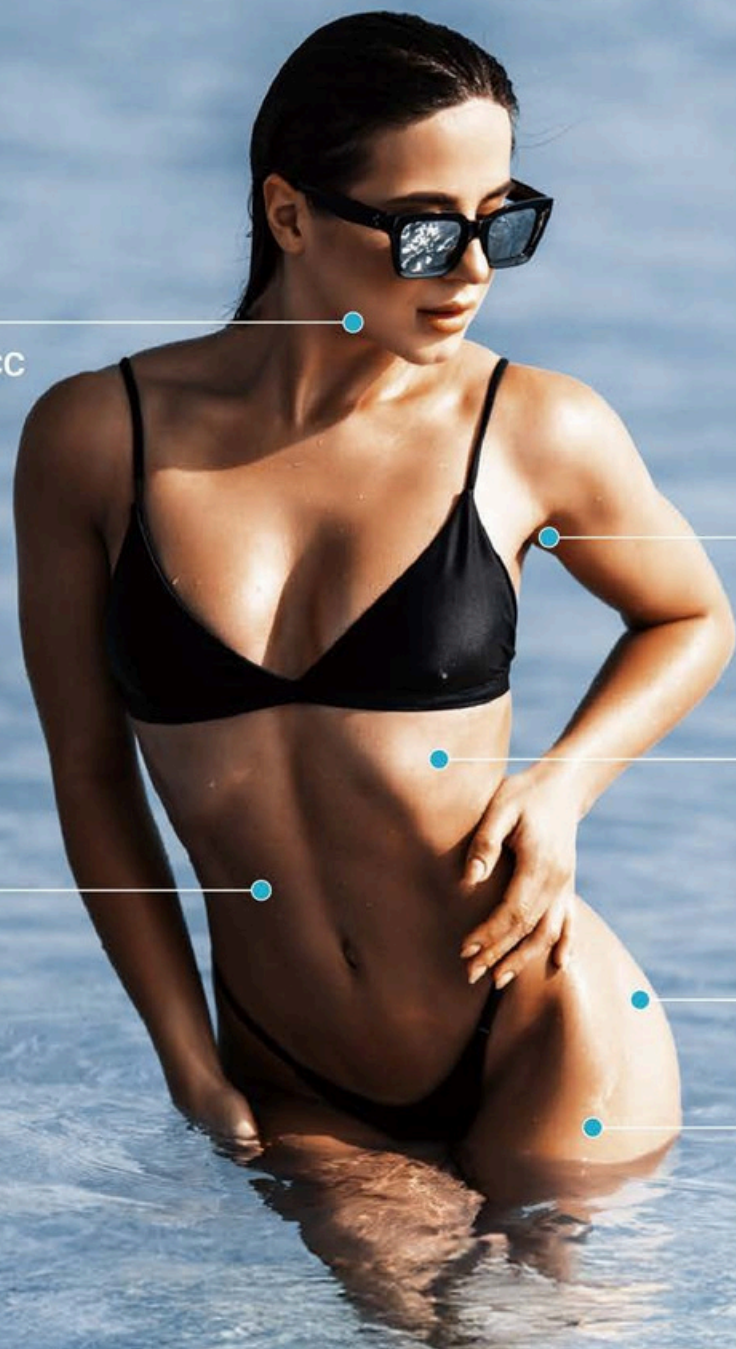

Upper-arms : 20 ~ 30 cc

Love Handle : 20 ~ 30 cc each

Abdomen : 30 ~ 40 cc

Buttocks : 15 cc each

Inner Thighs : 10 ~ 15 cc each

TREATMENT PROTOCOL

Treatment Area	Dosage of point	Depth	Interval of Point	Number of Point
Face (Sub-mental)	0.1 ~ 0.25 cc (0.5 ~ 0.8 cc)	2 ~ 4 mm	0.5 ~ 1.0 cm	20 ~ 25 points
Body	1.0 ~ 2.0 cc	6 ~ 12 mm	1.5 ~ 2.0 cm	30 ~ 70 points

• Face (Total: 10.0 ml)

The treatment is applied to both sides of the face along the jawline. Using 0.1 to 0.25 ml per point, four lines are created on each side, totaling approximately 5.0 ml per side.

The amount may be adjusted based on fat levels, with one vial sufficient for both sides.

• Forearms (Total: 20.0 ~ 30.0 ml)

0.5 ml to 1.0 ml is applied per point, with approximately 20 points treated on each forearm, including 10 on the inner and lower areas. Around 15.0 ml is used per forearm, totaling 20.0 ml to 30.0 ml for both forearms.

• Abdomen (Total: 30.0 ~ 40.0 ml)

Around 1.0 to 2.0 ml is applied per point, with a total treatment volume of approximately 50 ml.

The upper abdomen is treated with about 20 points focused on the central area, 15 points on each side, and 10 points on the surrounding areas.

• Thighs (Total: 20.0 ~ 40.0 ml)

The inner and lower thighs are treated in the same manner as the forearms. Approximately 10.0 to 20.0 ml is applied per thigh, with around 20 to 30 points targeted. Each thigh receives about 10.0 ml, totaling 20.0 ml for the entire procedure.

• Buttocks (Total: 10.0 ~ 20.0 ml)

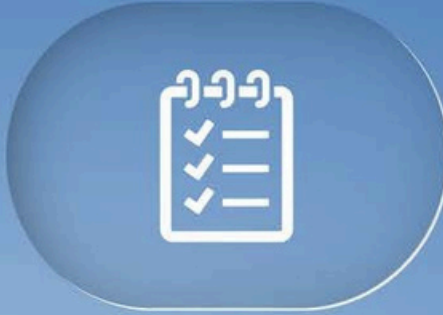

Above the lower line of the buttocks, 0.5 to 1.2 ml is applied at 1.5 cm intervals along the contour. The same process is repeated on the opposite hip, treating 10 to 15 points per side, with approximately 10 ml used in total.

TREATMENT GUIDELINES

Treatments are performed
1 to 3 times, with a **4-week interval**
between each session.

After the second treatment, intervals are
extended, with additional procedures
**based on the patient's needs and the
practitioner's assessment.**

The focus is on gradual, not
rapid, fat reduction.

Important Notes

Shake the vial well before use.

Do not use on inflamed areas.

Do not mix with other products; use immediately after opening.

Dispose of after use; do not reuse.

Do not apply more than 3.0ml to each area.

Store opened products in the fridge and use within 3 days for best results.

AFTERCARE INSTRUCTIONS

- ✔ Drink plenty of water. Avoid smoking and alcohol.
- ✔ Keep the treated area clean; avoid water contact for 24 hours.
- ✔ Avoid saunas and hot towels for a few days after the treatment.
- ✔ Gently massage the treated area and do light exercise.
- ✔ Refrain from friction and tight clothing on the treated area.
- ✔ Redness, swelling, and bruising may occur.
- ✔ Do not use for individuals with a soy allergy or any other serious allergies.
- ✔ Avoid sun exposure and tanning for at least a week to prevent hyperpigmentation.
- ✔ Do not perform the procedure on pregnant women, those with severe diabetes, or those in poor health.
